

Lyon, July 18, 2024

HYVOLUTION PARIS 2025 THE WORLD'S LEADING HYDROGEN EVENT WILL BE HELD FROM JANUARY 28 TO 30, 2025

Created in 2016, Hyvolution is undeniably the leading international event in the sector. This pioneering trade show will hold its 8th edition, with more than 600 exhibitors and brands expected.

For the third consecutive year, Hyvolution will be under the High Patronage of Mr. Emmanuel Macron, President of the French Republic. The renewed trust of the French public authorities is a testament to this international event, which brings together all the stakeholders of the decarbonized hydrogen ecosystem, from production to applications, including associated services in the three key markets: mobility, energy, and industry.

Hyvolution Paris 2025: The Only International Event Bringing Together All Stakeholders in the Sector

Covering the entire hydrogen value chain, Hyvolution Paris reflects the dynamic engagement of industry players committed to meeting the challenges of operational transition. By offering a comprehensive range where exhibitors include both industrialists and project developers, Hyvolution Paris 2025 is the only international event that brings together this diversity of profiles, united in one place for three days. Indeed, the uniqueness of this event allows ecosystems to be built around projects.

The need for hydrogen production is now as significant as the need for its applications, and Hyvolution Paris is currently the only event that concretely facilitates the meeting of all relevant parties. With an overview of the sector and the available technologies, Hyvolution 2025 will be the place where tomorrow's projects are built!

With an event resolutely focused on international collaboration, notably through the presence of major exporters and numerous exchanges beyond European borders, Hyvolution Paris will once again confirm its role as a launchpad for commercial innovations and international information.

As a true business accelerator for the entire hydrogen sector, Hyvolution Paris will take place over three days from January 28 to 30 at Paris Expo – Porte de Versailles (Halls 4 and 6). Bringing together the main international decision-makers in the sector, Hyvolution Paris 2025 will reach a new milestone and promises a significant event enriched with innovative content for which many stakeholders have already confirmed their presence.

Program Highlights

New for 2025: Hyvolution Conference will offer four key events addressing hydrogen challenges around the themes of Mobility, Industry, Financing, and Market Design.

Hyvolution Summit: The international gathering of political and economic leaders will return to discuss global political and economic strategies.

Hyvolution Workshops: Over 130 presentations focused on projects and solutions in Europe and worldwide. These 20-minute sessions will cover the latest news, innovations, and announcements from exhibitors, partners, and regions, providing an exceptional overview of the sector.

HYVOLUTION: THE GLOBAL ACCELERATOR OF THE HYDROGEN SECTOR

After the first edition of Hyvolution Chile in 2023, which brought together 3,800 visitors and 70 exhibitors in Santiago over three intense days, the leading trade show in South America will hold its second edition from September 3 to 5, 2024, in Santiago.

The expansion of the international Hyvolution network continues with the first edition of Hyvolution Canada, which will take place on October 1 and 2, 2025, at the Centre d'évènements et de Congrès Interactifs (CECI) in Trois-Rivières over two days.

Hyvolution HUB: A New Platform for the Hydrogen Community

Launched on February 2, following Hyvolution Paris 2024, Hyvolution Hub is an interactive platform where hydrogen sector stakeholders can meet, exchange ideas, share knowledge, and collaborate. It brings together hydrogen industry experts from around the world.

With over 31,500 connected members, Hyvolution Hub has established itself as the global meeting point for Hyvolution between virtual events and physical gatherings.

Hyvolution Hub offers:

- High-quality content (workshops and replays of Hyvolution Paris and Hyvolution Summit sessions available in full)
- Networking with over 31,500 connected members on a digital platform available 24/7
- Continuously updated content with webinars organized between each edition of the trade show

About the Organizer

GL events Exhibitions

With 200 public and professional events organized worldwide, GL events Exhibitions has developed extensive expertise in event organization, a field that requires advanced marketing, communication, and organizational skills while maintaining close relationships with market actors. The Hyvolution Paris trade show is organized by the GreenTech+ division, which also manages seven other events: BePOSITIVE, Expobiogaz, Eurobois, Open Energies, Paysalia, Piscine Global, and Rocalia.

GreenTech+ is a division of the GL events group, an unprecedented showcase born from synergies among trade shows focused on common themes such as ecological innovation and sustainable development.

With GreenTech+, the GL events group aims to take part in major environmental challenges, with a unique format that unites and offers new visibility to future-oriented sectors.

GreenTech+ is the accelerator through which the GL events group commits to supporting industry actors in their development, seeking tomorrow's solutions, and increasingly guiding citizens towards eco-responsibility.

Organized in collaboration with France Hydrogène

Bringing together 460 members, France Hydrogène unites the actors of the French hydrogen sector across the entire value chain: large industrial groups developing major projects, innovative SMEs and startups supported by excellent laboratories and research centers, associations, schools, competitiveness clusters, and local authorities mobilized for the deployment of hydrogen solutions.

France Hydrogène acts as the preferred contact for public authorities, working to:

- Represent all actors in the hydrogen sector
- Raise awareness and promote the sector's solutions
- Serve as the essential reference expert

- Deploy hydrogen
- Enhance the visibility of the French hydrogen sector

France Hydrogène supports the sector closely through its 14 regional delegations.

Its ambition is to accelerate the development of hydrogen solutions to achieve energy transition, reindustrialize the territory, and create local value to improve the quality of life for all.
